

Arcus Kjemi AS

- project info

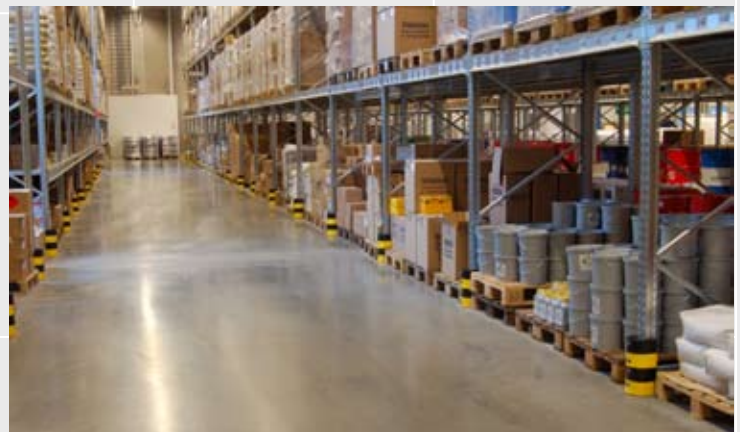

Project: Arcus Kjemi AS, Vestby
Sector: Chemical
Product: P90 Pallet Racking
Storage of: Chemicals
Month / year: 2006
Completed by: Constructor Norge AS

Arcus Kjemi moved to newly completed premises, where they wanted to maximize utilization of space to fit their needs. It was demanded that several operators had to be able to work the facility at the same time, and that measures be taken to reduce pick time. The solution had to include a sprinkler system because of the products' properties.

Solution:

The solution was conventional pallet racking; P90-Silverline including drive-through on the lower level to reduce pick time, an integrated sprinkler system and post-protectors for increased protection and optical line transport for forklift drivers.

Capacities:	Pallet places:	2868 pallets
	Shelf length:	40 meters
	Shelf height:	7 meters
	Number of pallets in height:	4 pallets

Integrated fire extinguishers

Integrated sprinkler system

Drive-through on parts of the lower level

Integrated driving passage for quicker service
