

Scan-Mar AS

- project info

Project:	Scan-Mar AS, Ålesund
Section:	Fishing industry
Product:	MOVO- mobile pallet rack with P90 Pallet Racking, P90 Pallet Racking
Storage of:	Packed, dried cod
Year:	2007
Delivered by:	Constructor Norge AS

Scan-Mar built new production premises and wanted to fully utilize and adjust it to meet their specific needs. Due to the large building- and managing costs, it was essential to maximize the volume of the cooler and avoid damage to the fish packed in cardboard boxes.

Solution:

The chosen solution was MOVO mobile pallet racking with P90 shelving, and stationary P90 pallet racking. Thus, the volume of the room was fully utilized, and each pallet is accessible at any time.

The facility also allows other pallet sizes by use of pallet decks, and by having closed bottom shelves with grating in the mobile shelves. Shelves and mobile shelving system are delivered in galvanized steel to withstand "salty" environment.

Specifications :	Length of mobile shelf unit:	32 meters
	Shelf-height:	5,8 meters
	Loading capacity:	260 tons per mobile shelf unit
	Pallet spaces:	1326 pallets
	Servicing:	forklift truck radio control

← P90 with pallet deck.

→ MOVO, mobile pallet racking

← Showing both P90 with pallet deck and MOVO, seen from above.
